

2008 LEXUS ES 350 Performance

Double Strength. Dual Variable Valve Timing with intelligence (VVT-i) continually monitors the needs of the engine, then uses this information to adjust the timing of both the intake and exhaust valves. Such fine-tuning allows the ES to deliver a smooth rush of power on demand. Not to mention a more efficient use of that power during less taxing conditions.

Standard Performance Features

3.5-liter V6 ■ 272 horsepower¹ ■ 254 lb-ft of torque¹ ■ Dual Variable Valve Timing with intelligence (VVT-i) ■ Six-speed sequential-shift automatic transmission ■ 17-inch seven-spoke alloy wheels and tires¹¹ ■ Dual exhaust system

¹¹See page 15 for more information.
